Damarapati Pavan Krishna

damarapatipavankrishna@gmail.com@gmail.com 9866885888 4-6-23/A/1 Reservior Colony,Tirupati, Andhra Pradesh, 517501

SUMMARY

Passionate Computer Science student with hands-on experience in Python, Java, and full-stack web development using React, Node.js. Comfortable working with MySQL, MongoDB, and Git, and always eager to learn new technologies. Excited about machine learning and creating engaging, efficient, and user-friendly digital experiences that make a real impact.

EDUCATION

UG (B.Tech in Computer Science and Engineering) 2023 – 2027
Amrita Vishwa Vidyapeetham, Amrita Vishwa Vidyapeetham Coimbatore

+2 / Intermediate / PUC / HSC 2022 – 2023
Maharishi International Residential School Sriperumbudur, Tamil Nadu

10th 2019 – 2021
Maharishi International Residential School Sriperumbudur, Tamil Nadu

PROJECTS

PHARMACY WEBSITE
The A2Z Pharmacy Website is a fully functional e-commerce platform designed for pharmacy needs.
It allows users to browse products, add items to a shopping cart, make payments, and manage their accounts. The site also provides essential contact information and a detailed "About Us" section to connect with users effectively.
- GITHUB: https://github.com/DPavanKrishna/Pharmacy_website

GeoHealth: Efficient Hospital Search and Management System
Objective:
The GeoHealth project is a comprehensive hospital management system designed to efficiently manage and search hospital data using advanced data structures like R-Tree, Trie, Heap, and Stack. It supports features such as location-based hospital searches, prefix-based search queries, priority-based hospital ratings, and search history tracking, providing a user-friendly and efficient solution for emergency and non-emergency scenarios.
GITHUB: https://github.com/DPavanKrishna/GeoHealth-Care

Autonomous Car Project - Navigating the Future with C++ Programming
Objective:
To design and implement an autonomous car system using C++ that detects and avoids obstacles through real-time ultrasonic sensor data, controls movement via DC motors and a steering servo, and enables both autonomous manual navigation modes using serial communication.
- GITHUB: https://github.com/DPavanKrishna/Autonomous_car

Luggage Security-System
Objective:
Built a smart luggage protection system using the STM32F401 and a lightweight ML model to detect theft based on gyroscope and vibration data. Integrated Bluetooth alerts, OLED display, RGB LEDs, and buzzer for real-time security status and alarms.
GITHUB:https://github.com/DPavanKrishna/Luggage-Security-System

SKILLS

Programming Languages
Python, java

Technologies
HTML, CSS, React, Node.js

Databases
MySQL, MongoDB

Tools
Git, GitHub

Technical skills
Machine Learning, Web development

AWARDS

Agentica Hackathon – 60-Hour Coding Sprint Indian Institute of Information Technology (IIIT) Sri City, Chittoor – March 2025
Participated in a national-level 60-hour hackathon as part of Abhisarga 2025, focused on building real- world software solutions through collaboration and rapid prototyping, and got the consolidation prize
